

Built Environment

The BID seeks to influence council and other public agencies decisions on the built environment in a way that will benefit – or at least not dis-benefit – local businesses. We cover issues such as planning, transport etc in the form of;

- resident parking schemes
- other parking such as car parks
- metro bus
- planning and development
- waste and street cleansing
- etc

Of particular interest to businesses on East Street (eg St Catherine's Place below) will be the major new residential developments on East Street and around Malago Way that will bring potentially thousands of new customers and £ms of fresh economic demand.

Built Environment is a 'live' and thus constantly changing series of projects for the BID. If you wish to know more please look out for updates in the digital newsletters or ideally get involved via our monthly Built Environment meetings – usually¹ 2pm first Tuesday of each month in Sea Pearl, 73 East St.

¹ Please check with us as sometimes these meeting skip a month
